05 <b>030135</b> 001	1 IPR	40	97	2,0	1 <sup>9</sup> / <sub>16</sub> "	

#### Rotating cap and fast-turning zone

The fast-turning zone just below the rotating cap allow rapid twisting. This makes time-consuming grip adjustments as with other conventional precision screwdrivers unnecessary.

#### The power zone

The power zone has integrated soft zones near the blade tip to ensure high torque transfer for loosening or tightening screws without losing contact with the screw.

#### The precision zone

The precision zone directly above the blade gives the user a better feel for the right rotation angle during fine adjustment work.
