Extended Manufacturer Warranty

The official warranty periods for TDK-Lambda products are defined in the published specifications for each series.

TDK-Lambda grants a Limited Lifetime Warranty for certain series of units. This extended warranty applies only to products specifically designated by TDK-Lambda as having a Limited Lifetime Warranty.

These units are covered by an extended warranty of up to 5 years after production has ceased and they have been withdrawn from the market (date determined by TDK-Lambda), but for a minimum of 10 years from the date of sale directly by TDK-Lambda or one of its authorized distributors to the end customer. The maximum warranty period granted is 30 years.

The warranty is conditional on the proper use and application of the equipment within the published specifications based on the applicable standards from the respective equipment approval. Excluded from this extended warranty are fans, blowers and other components for air circulation as well as assemblies thereof.

This warranty is limited to the direct purchaser and is not transferable. Both TDK-Lambda's standard warranty and the Lifetime Warranty are void in the event of modification, misuse or attempted repair by an end user, customer or third party.
