Declaration

To whom it may concern

Subject: Delegated Regulation (EU) 2020/217 (referred to as the 14th ATP)

Dear Madam,

Dear Sir,

The European Union has launched a re-evaluation of the substance titanium dioxide via the regulation 2020/217. This new regulation impacts the labeling of products containing certain forms of Titanium Dioxide (TiO₂). TiO₂ can be present in a variety of goods, a limited range of CRC products contain TiO₂, in various concentrations. These products are mainly Paints. The labeling of liquid mixtures is applicable (in most cases) on the CRC products concerned.

Liquid mixtures containing titanium dioxide shall be labelled with the supplemental labelling element EUH211, if they contain at least 1 % (w/w) of titanium dioxide particles with an aerodynamic diameter of 10 µm or less.

Based on the info from suppliers, CRC has adapted the label design of the impacted products according to supplier's SDS. Needless to say that the pandemic had an impact on sales cycles of our products and supply of new labels/ litho cans.

Underneath you find an overview of the products in scope of supplementary warning and the quantities supplied to Buerklin in 2021.

SCAD-num	Sales Reference	Description	Sum of Quantity
31079-004	31079	ACRYL PAINT 7035 LIGHTGREY 6X400ML EUPE	18
31075-004	31075	ACRYL PAINT 9005 BLACK MAT 6X400ML EUPE	12
11678-003	11678	ACRYL PAINT 3000 FLAMERED 6X400ML EUPE	12
31063-005	31063	ACRYL PAINT 9005 BLACK GLOS 6X400ML EUPE	12

Sincere regards,

Nic Baetslé

Sales Director Western Europe
